

Text Interpretation - HTML (advanced)

With Text Interpretation - HTML (advanced) it is possible to include HTML objects such as tables in reports. This report contains 3 formulas. The formula "Table" contains a table with 2 columns and fields with different colors in each row. The formulas "NumberedList" and "BulletList" contain numbered and bullet lists, respectively.

| Different Colors in HTML table | |
|--------------------------------|---------|
| aqua | black |
| blue | fuchsia |
| gray | green |
| lime | maroon |
| navy | olive |
| purple | red |
| silver | teal |
| white | yellow |
